

$$\textcircled{1} [(8,800 - 575) + 2,600] \times 6,575 - 500 \times 2,000 = 70.174\text{m}^2$$

$$\textcircled{2} (8,800 - 575) \times 6,575 = 54.079\text{m}^2$$

$$\textcircled{1} + \textcircled{2} \quad 70.174 + 54.079 = 124.253\text{m}^2$$
